

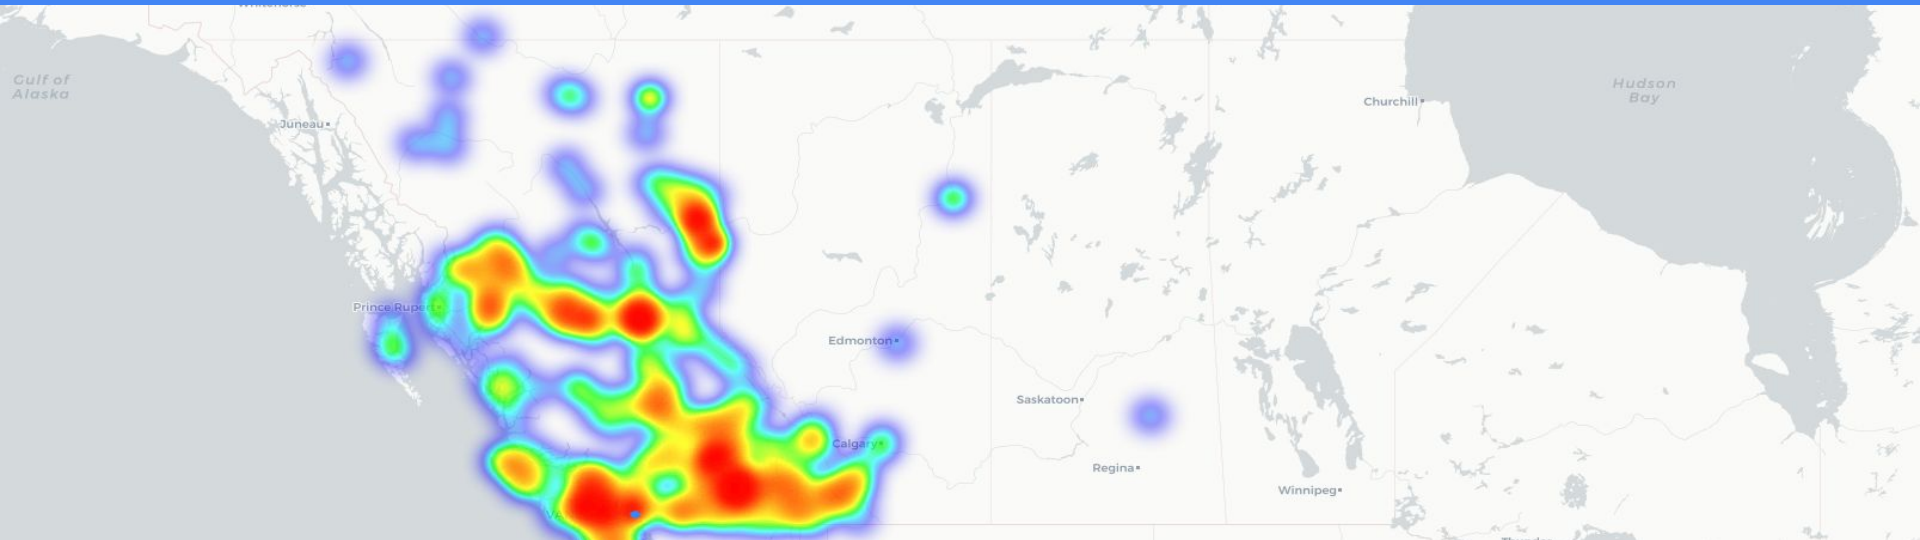

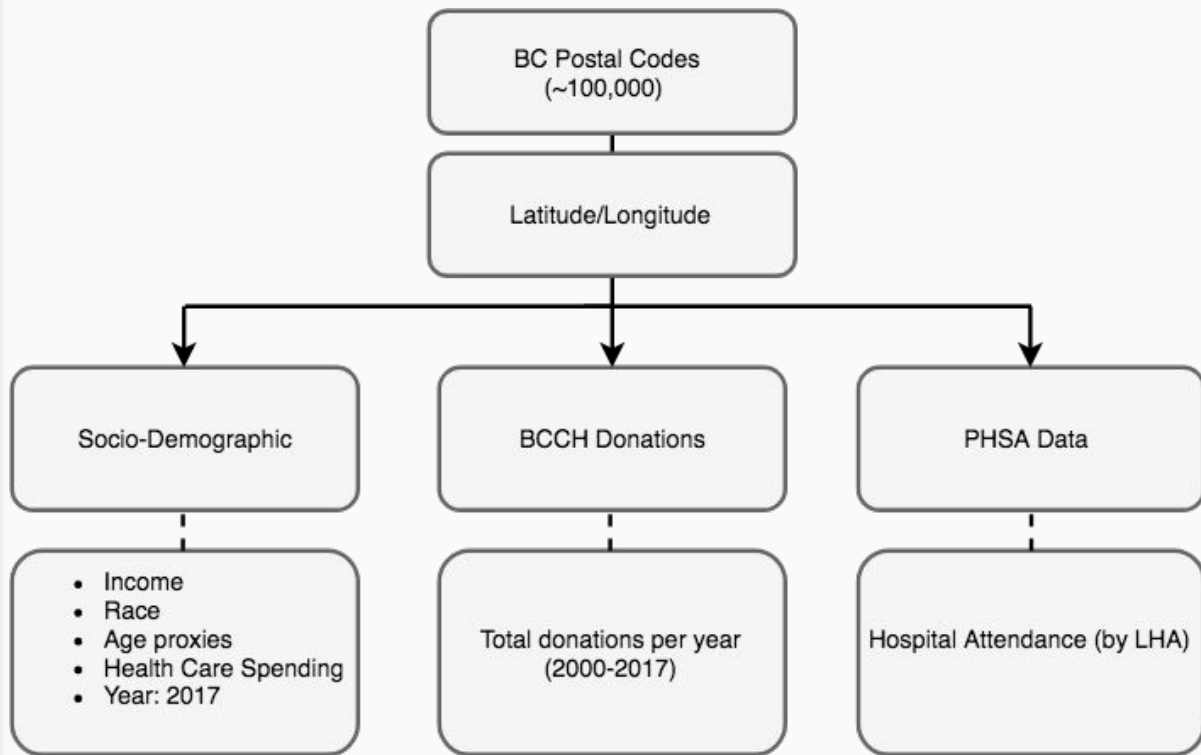

Mapping Donations

BC Children's Hospital Foundation

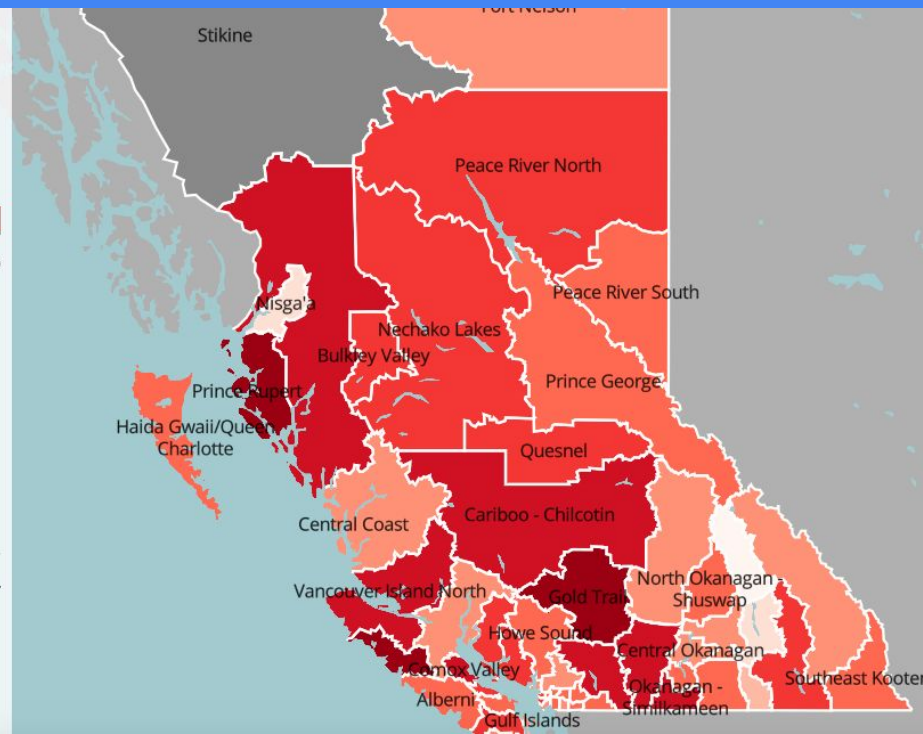

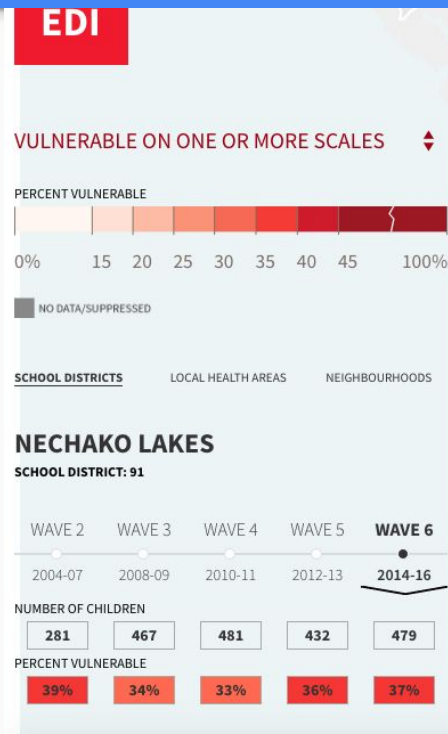

Data

Goal : Interactive map/dashboard

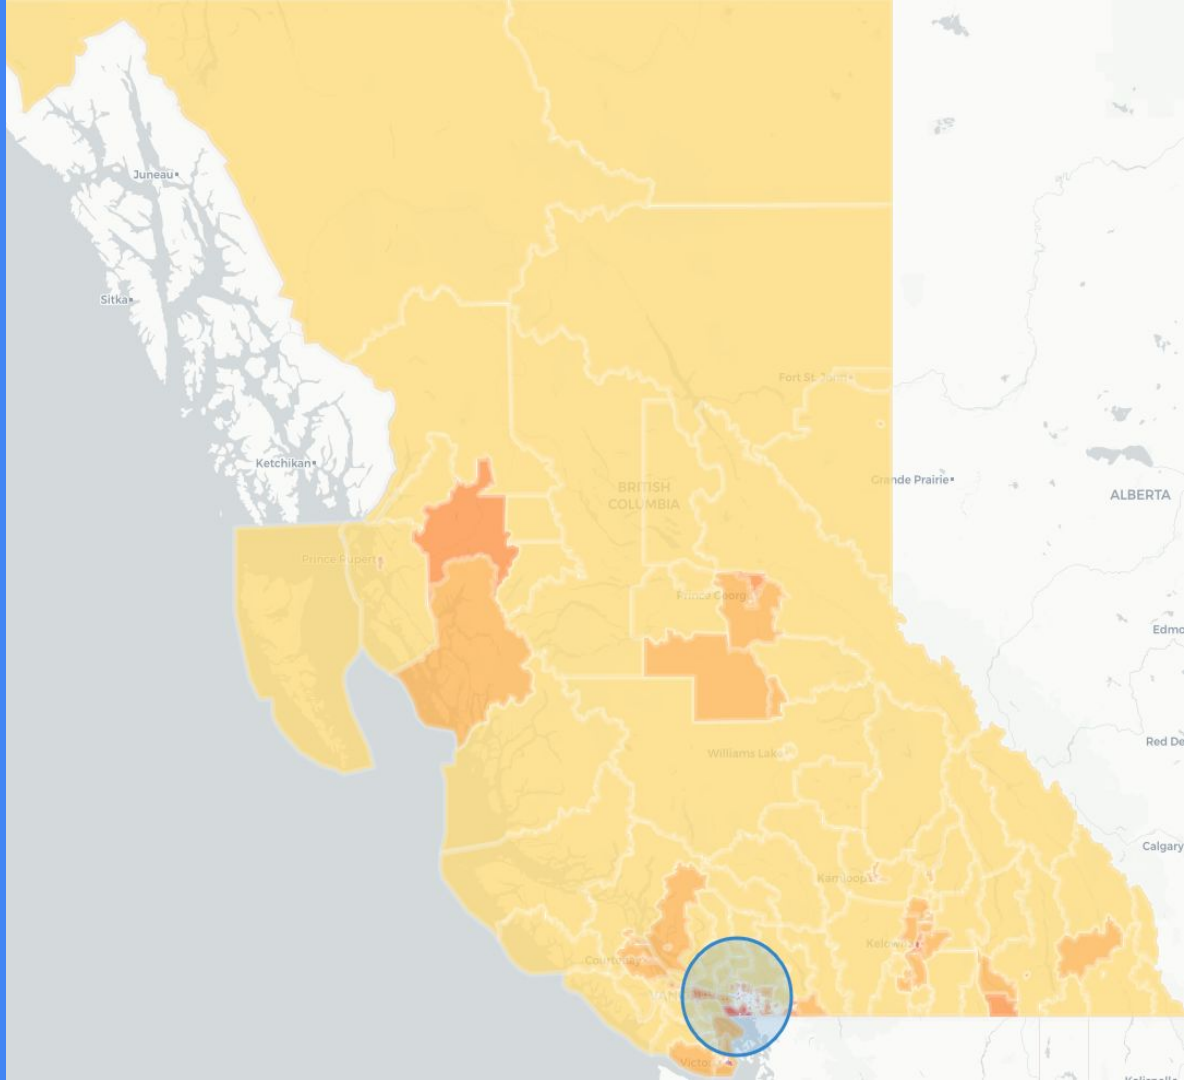

Example: HELP Interactive Choropleth

- Data at Neighbourhood Level/LHA Level
- Includes yearly changes
- Drop down menu for different variables

So far:

- Data Aggregated & assigned at neighbourhood level
- Data plotted using folium library in python

Next Steps:

- Switch from python to javascript/D3 (can I combine folium with standard javascript?)
- Add further interactivity

Thanks!
